

## **Android Developer**

Are you curious about how social networks and positivity can change the way food, beverage and hospitality businesses attract new customers? Are you a fan of new technologies who enjoys growing and sharing knowledge? A foodie, lifestyle guru or somebody who loves to experience new places? To support our vibrant and growing Development team in Lisbon, we are seeking a passionate and forward-thinking Android Developer that will use your code expertise to make your mark by improving our products. You will be working alongside other engineers and developers working on different layers of the infrastructure.

### **About TWISPER**

TWISPER is a social travel app to discover and share great restaurants, hotels and bars around the world. The app is 100% ad-free and only has real users and positive, personal recommendations. TWISPER's community includes friends, partners and influencers. With partners, TWISPER also organizes charity campaigns to help the world become a better place.

To have a positive impact on the hospitality and gastronomy industry, TWISPER recently launched TWISPER Business, a platform where businesses can get new guests through digital word of mouth. Unlike TripAdvisor and other unfair booking systems, TWISPER Business features no negative reviews, no commissions, no fake users and no ratings that negatively affect businesses everywhere.

### **The Job**

We are looking for an Android Developer who possesses a passion for pushing mobile technologies to the limits. You will help the team solve problems in a way that makes sense for Android users and our codebase, shaping the direction of Android development at our company.

This Android app developer will work with our team of talented engineers to design and build the next generation of our mobile applications. Android programming works closely with other app development and technical teams.

Therefore, a commitment to collaborative problem solving and the creation of quality products is essential.

## **Main Responsibilities**

- Design and develop advanced applications for the Android platform
- Ensure the performance, quality, and responsiveness of applications adhering to Android development best practices
- Collaborate with cross-functional teams to define, design, and ship new features
- Identify and correct bottlenecks and fix bugs, improving application performance
- Help maintain code quality, organization, and automatization
- Unit-testing code for robustness, including edge cases, usability, and general reliability
- Work with outside data sources and APIs
- Continuously discover, evaluate, and implement new technologies to maximize development efficiency
- Help your team solve problems in a way that makes sense for Android users and our codebase, shaping the direction of Android development at our company

## **Pre-requisites**

- Proven software development experience in Android development (minimum 3 years)
- Proven experience with Kotlin (minimum 2 years)
- A passion for technology and the ability to learn new concepts quickly
- Proven experience in unit tests, LiveData and RxJava
- Proven experience with architectural pattern MVVM

- Excellent written and spoken language skills in English
- Working knowledge of the general mobile landscape, architectures, trends, and emerging technologies
- Solid understanding of the full mobile development life cycle
- Critical thinker and problem-solving skills
- Team player
- Good time-management skills
- Great interpersonal and communication skills

## Nice to have

- Knowledge in Firebase
- Experience in chat development
- Published at least one app
