

PHP Backend Developer

Are you curious about how social networks and positivity can change the way food, beverage and hospitality businesses attract new customers? Are you a fan of new technologies who enjoys growing and sharing knowledge? A foodie, lifestyle guru or somebody who loves to experience new places? To support our vibrant and growing Development team in Lisbon, we are seeking a passionate and forward-thinking PHP Backend Developer that will use your code expertise to make your mark by improving our products. You will be working alongside other engineers and developers working on different layers of the infrastructure.

About TWISPER

TWISPER is a social travel app to discover and share great restaurants, hotels and bars around the world. The app is 100% ad-free and only has real users and positive, personal recommendations. TWISPER's community includes friends, partners and influencers. With partners, TWISPER also organizes charity campaigns to help the world become a better place.

To have a positive impact on the hospitality and gastronomy industry, TWISPER recently launched TWISPER Business, a platform where businesses can get new guests through digital word of mouth. Unlike TripAdvisor and other unfair booking systems, TWISPER Business features no negative reviews, no commissions, no fake users and no ratings that negatively affect businesses everywhere.

The Job

We are looking for a PHP Backend Developer who possesses a passion for developing beautiful, innovative applications, then you will love this job!

You will develop all server-side logic, define and maintain the central database, and ensuring high performance and responsiveness to requests from the frontend.

This Backend developer will work alongside our team of talented engineers and developers to create comprehensive digital solutions for business needs.

Therefore, a commitment to collaborative problem solving and the creation of quality products is essential.

Responsibilities

- Integration of user-facing elements developed by frontend developers
- Build efficient, testable, and reusable PHP modules
- Solve complex performance problems and architectural challenges
- Integration of data storage solutions
- Be involved and participate in the overall application lifecycle
- Main focus on coding and debugging
- Troubleshoot and debug applications
- Collaborate with Front-end developers, multidisciplinary team of designers, developers and system administrators
- Build high-quality reusable code that can be used in the future
- Learn about new technologies
- Stay up to date with current best practices
- Manage cutting-edge technologies to improve applications
- Take initiative in improving the software in small or large ways to address pain points in your own experience as a developer
- Keep code easy to maintain and keep it easy for others to contribute

If you have:

Mandatory requirements

- Proven professional experience in PHP OOP (minimum 2 years)

- Proven professional experience with PHP framework (Laravel, Symfony, Phalcon, or similar frameworks)
- Strong knowledge of REST API
- Knowledge of GIT
- Knowledge of database systems (relational and non-relational)
- Written and spoken language skills in English
- Critical thinker and problem-solving skills
- Team player
- Good time-management skills
- Great interpersonal and communication skills

Nice to have

- Knowledge of cache systems (Redis)
- Knowledge of Neo4j
- Knowledge of GraphQL
- Knowledge of Cloud Services (AWS, Azure, GCP, etc)
- Experience with TDD and unit tests
